Software Engineer specializing in React, TypeScript, and Next.js with expertise in building performant, accessible, web applications. Proven track record delivering measurable improvements: ~30% faster load times, 90+ Lighthouse scores, and reduced error rates through comprehensive testing and optimization. Experience with Agile/Scrum, and full-stack development using Node.js, .NET, and SQL databases.

Experience

Sistemas Integrados de Informatica	Remote, Dominican Republic
Full Stack Developer	Jan 2024–Aug 2025
<ul style="list-style-type: none">• Migrated legacy consumer-banking modules from AngularJS to Flutter (Dart), cutting load time ~30% and improving responsiveness across core flows via lazy loading and caching.• Delivered secure web features for Dominican banks (Banco Promerica, BLH, ADEMI, Banco Santa Cruz) using C#, ASP.NET (MVC/Web API), TypeScript, jQuery, HTML/CSS, SQL Server; met internal security requirements and passed audits.• Optimized transactional forms serving 20K+ daily users with client/server validation (.NET + SQL / stored procedures) and UI refactors, reducing user errors/support tickets and raising completion rates.• Established Git best practices—PR reviews, Gitflow branching—which reduced integration issues and accelerated releases.• Collaborated in Agile/Scrum with product, QA, and ops; refined requirements into user stories with acceptance criteria and shipped predictably each sprint.	
Makisan Tech	Remote, Argentina
Full Stack Developer	Apr 2023–Aug 2023
<ul style="list-style-type: none">• Built a responsive, accessible healthcare web app with React, TypeScript, Tailwind CSS, Redux Toolkit; deployed on Vercel, improving task completion across key flows and keeping Lighthouse 90+ scores.• Standardized a reusable component library and design tokens (spacing/color/typography), increasing UI consistency and reducing rework during new feature builds.• Introduced Git best practices—GitHub flow, mandatory PR reviews, and preview URLs—which reduced merge conflicts and improved release cadence.• Implemented REST APIs with Node.js (Express) and PostgreSQL/Sequelize, adding input validation, pagination, and error handling for core resources.	
Freelance Software Engineer	Remote, United States
Front-end / Full Stack Developer	Jun 2022–Dec 2022
<ul style="list-style-type: none">• Built & launched a conversion-focused landing page with React + React-Bootstrap on Vercel, including secure PDF generation/download and a form workflow (Vercel Forms); increased qualified leads and reduced manual handling.• Designed a responsive mobile-first layout (CSS Grid/Flexbox, accessible semantics), improving usability across devices and maintaining Lighthouse 90+ scores.• Set up process & delivery: lightweight Scrum (weekly sprints, backlog grooming in Trello/Jira) and preview deployments, enabling predictable releases and faster stakeholder sign-off.• Hardened the flow with client/server validation (React forms + server checks), reCAPTCHA/anti-spam, and error logging for reliable submissions.	

Education

John Jay College of Criminal Justice	New York, NY
B.S., Computer Science & Information Security	May 2022
Borough of Manhattan Community College	New York, NY
A.S., Computer Information Systems	Jun 2020

Skills

Programming Languages: JavaScript (ES6), TypeScript, C#
Frameworks & Libraries: React, HTML, CSS/Sass, Tailwind, Redux Toolkit, Node.js, Express, Prisma, Flutter/Dart, Next.js
Backend & Databases: .NET, SQL Server, PostgreSQL, Sequelize, REST APIs
Tools: Git, GitHub/Bitbucket, Jira/Asana, Vercel, Lighthouse
Languages: Spanish (native), English (professional)

Online Certificates & Courses

HENRY	Online
Full Stack Developer Bootcamp	Apr 2023
